

SCIENCE – free resource

<https://explorify.wellcome.ac.uk/blog/topics/Explorify%20at%20home>

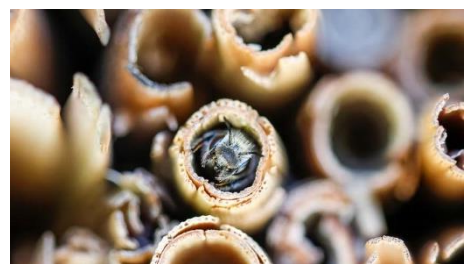

Explorify is an excellent site that we regularly use in school. Some of the children's favourite activities are: 'Zoom In, Zoom Out', 'Odd One Out', 'What's Going On'.

Explorify from home is a special series of science activities collections, designed for teachers to share directly with the parents and carers of primary school children who are learning at home.

The activities are defined by age and curriculum topics in Explorify, but these collections are also suitable to do all together as a family of mixed aged children. Or if your little scientists just want to explore further, pick something from the other age sections for inspiration!

The collections:

- Habitats
- Human body
- Changing materials
- Forces
- Classification
- Properties of materials
- Plants

Have fun exploring!
