

# Bouncy Egg

## Science Experiment

### Method

1. Place the boiled egg in the bowl.
2. If you would like the finished egg to be coloured, add a few drops of food colouring to the vinegar.
3. Cover the boiled egg with vinegar and cover the bowl with cling film.
4. Leave for 3-5 days.
5. After 3 days, remove the egg from the bowl and rinse the shell off the egg under a gently running tap.

### You will need:

- One boiled egg
- White vinegar
- Food colouring (optional)
- Bowl
- Cling film

We hope you find the information on our website and resources useful. The activities set out in this resource are potentially hazardous. The activities are not suitable for all children and adult supervision may be required for some of the activities. It is your responsibility to assess whether the children in your care are able to safely carry out the activities and whether the children require adult supervision. You are responsible for carrying out proper risk assessments on the activities and for ensuring that activities can be carried out safely. We are not responsible for the health and safety of your group or environment so, insofar as it is possible under the law, we cannot accept liability for any loss suffered by anyone undertaking the activity or activities referred to or described in this resource. It is also your responsibility to ensure that those participating in the activity are fit enough to do so and that you or the organisation you are organising for has the relevant insurance to carry out the physical activity. If you are unsure in any way, we recommend that you take guidance from a suitably qualified professional.
