

# Grow a Bean in a Bag

## Science Experiment

### Method

1. Wet the paper towel and put it inside the bag.
2. Put the bean on the paper towel and seal the bag.
3. Tape the bag to a sunny window.
4. The seed needs warmth to germinate and the sun should provide that. Plus the light will enable everyone to see the germinating seed better. It should take 3-5 days for the seed to germinate. Keep the paper towel moist, you may need to add a bit of water to it if it dries out. After 2 weeks, your bean can be planted in the soil or in a pot.

### You will need:

A ziplock bag  
Paper towels  
Water  
Bean seed  
Sticky tape

We hope you find the information on our website and resources useful. The activities set out in this resource are potentially hazardous. The activities are not suitable for all children and adult supervision may be required for some of the activities. It is your responsibility to assess whether the children in your care are able to safely carry out the activities and whether the children require adult supervision. You are responsible for carrying out proper risk assessments on the activities and for ensuring that activities can be carried out safely. We are not responsible for the health and safety of your group or environment so, insofar as it is possible under the law, we cannot accept liability for any loss suffered by anyone undertaking the activity or activities referred to or described in this resource. It is also your responsibility to ensure that those participating in the activity are fit enough to do so and that you or the organisation you are organising for has the relevant insurance to carry out the physical activity. If you are unsure in any way, we recommend that you take guidance from a suitably qualified professional.
